Astron. Astrophys. Suppl. Ser. **125** (1997) 459-469

The following modifications have been made to the tables of the paper “Properties of nearby clusters of galaxies. III. A 76, ...”, *Astron. Astrophys. Suppl. Ser.* **125**, (1997) 459-469, published only electronically at the CDS (<http://cdsweb.u-strasbg.fr/Abstract.html>). For A 1213 and A 1775 absolute coordinates α , δ have been revised; in the case of A 407, A 1185, A 1775, A 1213, A 2053, A 2063, A 2319, A 2593, A 2597 an “s” or “d” has been added to indicate stars or double object respectively, and some unreliable data cooresponding to faint objects very close to birght ones have been erased. For A 1185 and A 1213 a label to correctly identify the objects on the map in Trèvese et al. (1992), A&AS 94, 327 has been added. Table 2 must be replaced with the following:

Table 2: *Addendum* to Trèvese et al. (1992): Abell 1213

α	δ	R_1	ϵ	θ	m_T	m_a
11 16 22.6	+29 15 07	16	0.29	69	13.8	14.8
11 16 17.3	+29 13 34	16	0.44	143	13.8	14.0

The Local Group dwarf irregular galaxy IC 1613

I. The young stellar content
